

The Honey OWEISSES

100% Pure Jordanian Honey
Produced by Oweiss Apiaries

Reason behind creating the Honey Oweisses

- Trying to empower Jordanian women in rural areas in Jordan, help them become economically powerful so that they give back to the community and help improve the society, the idea of bee keeping and producing pure Jordanian honey was born.
- We gave our honey the name of The Honey Oweisses, which refers to our family name Oweiss. Part of our honey sales revenue will go towards educating the needy students in our country, which is another small project that we started a few years ago. We strongly believe that educating children and empowering woman will positively and enormously improve societies.
- All of our honey is bottled by hand to support the local economy by creating jobs. We are also looking for opportunities to export pure Jordanian honey produced in our local apiaries overseas. We strongly believe that pure honey could be a good remedy for many diseases and hope that our honey will be reachable to all those who need it.

What we offer

- Honey jars in different sizes.
- Gift packages in different sizes.
- Customized individual and corporate gift packages.

* Free delivery inside Amman

Project vision

- Students' education and well being (paying school tuition fees for needy school students, arranging fun days for unfortunate students).
- Women empowerment (creating job opportunities).
- Creating awareness of the benefits of honeybees.
- Exporting raw and pure Jordanian honey to different destinations.

Our different products

Sidr Honey

Has been proven to help stomach pains, infections, diseases, cancer, digestive problems, liver problems, wounds, skin care, constipation, eye diseases and strengthens the immune system which overall gives better health and liveliness

Citrus Honey

Lemons are fortified with Vitamin C and citric acid. Both of these element boost immune system and helps to fight off the bacteria within your body

Wild Flowers Honey

Organic wildflower honey contains nutrients and minerals that help a person's body in several ways. For instance, honey around the world is majorly used with cinnamon as a concoction to lose weight. The enzymes present in raw honey improve metabolism and helps in digesting food quickly

Our different products

Bee Pollen

Relieve inflammation / work as an antioxidant / boost liver health / strengthen the immune system / work as a dietary supplement / ease symptoms of menopause / reduce stress speed up healing

Loquat Honey

Harvested in early spring, loquat honey has laxative and relaxing properties. It helps hair and nail growth. It is used for sour throats and respiratory diseases

Our different products:

Creamy Honey

Since it is less messy than liquid honey, the creamy is great for kids and parents, too!

With its fluffy consistency it is easy to remove from a jar and it spreads splendidly on toast, biscuits, rolls. It can still be used for baking and cooking or just use it by the spoonful.

Creamed honey is nutritious, sweet and extremely versatile in recipes.

Honeycomb

Honeycomb is a natural bee product consisting of waxy, hexagonal cells which contain raw honey. Honey and its comb are edible and offer numerous health benefits, such as fighting infections and improving heart health. Honeycomb may also boost liver function and serve as a sugar alternative for people with diabetes

Packages

Corporate and individual gifts packages

We design different types of packages for different occasions which can meet individual and corporate taste in terms of sizes and cost.
