Specialized Projects Division

Specialized Projects

Specialized Projects Logistics Solutions

Capitalizing on our regional and global expertise in complex, heavy-lift and out-of-gauge project cargo, we cater to the complex requirements of the industry, offering advanced standards of reliable, safe, and compliant freight and customs management to multimodal projects of **rig movements, power plants, military projects, oil and gas, humanitarian aid contracts**, and other over-dimensional moves, with a strong network in Lebanon, Jordan, Iraq, UAE, and Turkey.

The industry's unique requirements demand the consultancy of not only logistics experts, but engineers as well. Since Project Cargo equipment is often too large to be transported via conventional methods due to small vehicles, tight roads and tunnels, or areas with low hanging trees, alternative methods must be carefully and speedily studied and planned for. The Net Global works closely with engineers to determine how to transport your large equipment in an efficient and safe manner.

Specialized Projects

Specialized Projects Cargo Services

We cover the complete solution for Project moves, of oversized and heavy or non-standard cargoes from destination to delivery area.

- Project & Heavy Lift Logistics (Heavy Lifts & Cranes: engineering, jacking, lashing, skids, cranes, etc.)

Our Business Model

*Sequence, Packaging, Sub-assembly, Call Center.

Integration & visibility through MATRIX™ technology

Specialized Projects

Control Tower For Critical Services

With our global experience, we offer optimized and cost-efficient solutions managed by a dedicated well trained team of professionals.

Rig Down Situation

This is the most critical shipment. In such situations, we select the best available service the airline has to offer to ensure the customers' product is guaranteed to be loaded and safely en route to its final destination.

Direct Airfreight

This is still treated as UAF. Again our teams look for the fastest options while taking the cost factor into account.

Urgent Airfreight

This could be a potential rig down item. Our teams will search for all time-critical options, which allow our customers to select the best cost versus benefits solution.

Specialized 24/7 Support - Key Energy Personnel

- Charters
- On-board courier
- Later departures / earlier arrivals
- Secure closed-loop network
- Competitive pricing
- No size or weight restrictions
- Customized flexibility
- Online tracking capabilities
- Guaranteed service options

Specialized Projects

P/O Management - Visibility & Support

With state-of-the-art proactive alerts and customized performance reporting, we help you make better and faster business decisions.

Line Item Visibility

- PO and line-item visibility for items on shipment from origin to final destination
- Online web-based control tools
- Real Time updates and line item status

OS&D Reporting

- Accurate OS&D reporting per line item
- Performance reporting: Measure vendors, carriers, NP and yourself against SLAs and customized business rules.
- Discrepancy reporting; ex Overages, Shortages and Damages.

Data Management

- Master data management
- Milestones
- Document visibility online

Total Costs Reduction

- Optimization of supply chains to reduce costs
- Reduce errors
- Eliminate miss-shipments
- Reduce cost on administration

Invoicing

Create and audit invoices based on customized requirements

Shipment Tracking

Track your shipments online by AWB No., PO No. & Reference No.

Specialized Projects

Lebanon Warehousing Solutions

The Net Global has 2 fully equipped warehouses to store merchandises; at Karantina & at Beirut Port Freezone.

Specialized Projects

Lebanon Warehousing Solutions

The warehouses can secure more than **5,000 pallet positions** and utilize modern material handling equipment to ensure high performance, innovative technology, and optimum ergonomic working conditions.

They are equipped with the proper number of labors and diesel forklifts ready to handle all types of trucks and containers (regular and reefer containers).

All items are stored in their original package and placed on Pallets (EU standards) at least 15cm above the floor, and all GWP instructions are properly followed.

All equipment is regularly checked and well-maintained.

Executed Projects

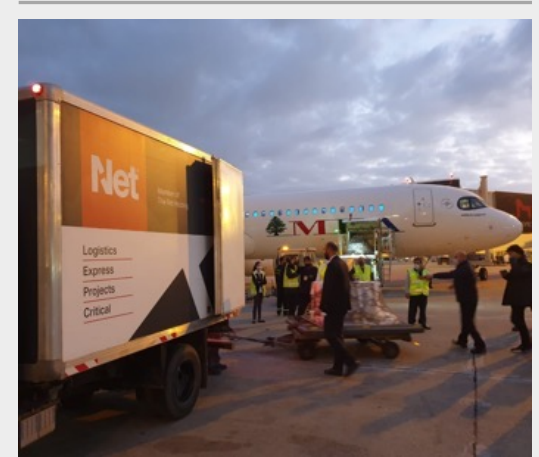

Specialized Projects

Humanitarian Aid Projects

The Net Global has extensive experience in Humanitarian Aid Contracts.

Some of our Humanitarian Projects include, but are not limited to the following:

- The Lebanese Army Air Chartering movement project that consisted of the off-loading charter vessels and aircraft bringing aids with full inventory management of the warehouses and delivery to the cities and villages in south Lebanon.
- Chartering UNHCR Food Relief Aids and storing them in our freezone warehouses.
- The special logistics services for The Lebanese High Council of Relief, through managing all the donor countries and UN agencies aids that came to Lebanon during this phase.

Corporate Governance

The Net Global

Corporate Governance

Compliance, business ethics, and corporate social responsibility are at the forefront of The Net Global daily work practices.

- We conduct our business within a framework of laws, regulations and best ethical practices.
- We are dedicated to upholding human rights, acknowledging and honoring employees' entitlement to manage their work hours.
- We are committed to offering fair and competitive compensations and benefits that surpass legal standards.
- Our pledge extends to adhering to ethical recruitment and equitable labor practices, prohibiting the utilization of child labor, forced or compulsory labor, and fostering a work environment that does not tolerate any form of harassment or discrimination.

We are proud to have demonstrated a high level of disclosure and overall performance across five dimensions:

1. Female Leadership
2. Talent Acquisition Pipeline
3. Equal Gender Pay
4. Inclusive Culture
5. Harassment Condemnation

We have the expertise and proven track record in managing safe operations for all types of projects, and our staff is constantly trained on compliance, quality, health, safety, and Information security measures to highlight the criticality of compliance in all areas of the business.

The Net Global

International Certifications & Standards

Our solutions are compliant with international certifications and standards – ISO, FCPA, QHSE, IS, GDP and TRACE - ensuring compliance to global norms, regulations and standards.

We are committed to:

- Delivering high quality business services that meet or exceed our customers expectation.
- Ensuring the four essential principles for guarding electronic data systems, which are: Confidentiality, Integrity, Availability, Privacy.
- Providing a safe and healthy workplace, and work environment for our employees and stakeholders.
- Adopting all reasonably practicable means to eliminate hazards and reduce the risks of injury to our employees and stakeholders.

- Adhering to the guidelines of the European Union General Data Protection Regulation (EUGDPR) and the ESG standards.
- Aiming for continual improvement in all areas of the operations.

We are certified with the following ISO certificates for International Express & Domestic Courier, Logistics, Warehousing, Cargo Services, and Pharma Logistics.

- **ISO 9001:2015** - Quality Management Systems
- **ISO 14001:2015** - Environmental Management System.
- **ISO 45001:2018** - Occupational Health & Safety (OH&S) Management System.
- **ISO 27001:2022** - Information Security Management System.
