

UNIVERSAL LOGISTICS COMPANY

DYULC

FOR THE SUCCESS OF YOUR BUSINESS

DYULC

WE OFFER CONFIDENCE AND SATISFACTION

CEO's Message

DYULC Co., Ltd. was incorporated to offer the best competitiveness in realizing the dreams of our customer by delivering customizable business solution distinguished from conventional logistics services. Effectively reflecting market trends in ever-changing business environment, we commit ourselves to fulfilling our obligations and responsibilities as your sincere partner with more proactive mindset, creative thinking and challenging spirit while putting the first priority on customers. DYULC is staffed with professionals experienced extensively in a variety of domains plus young staff members to deliver responsive and reliable services. Drawing upon long-standing experience and ample know-how, we have systemized processes applicable to various situations expected in the field of logistics, with commitment to continuously developing systems that deserve to be relied upon by customers. In addition, we contribute to boosting up the national competitiveness of Korea built on energy resource development initiatives by trading and supplying rare earth elements and energy resources such as coal. DYULC will always be at your service and we are firmly determined to be logistics professionals who will be touted by customers satisfied with our performance. We believe we will make our customers happy by fulfilling our roles and responsibilities as logistics professionals always focused on customer satisfaction.

Yang, Jae-do, CEO

Vision

DYULC is being born again as a globally competitive specialized logistics company offering professional business to ensure success in customers' business under the motto of "Corporation Managing the Future with Enthusiasm and the World with Technology."

*We offer complete
and professional services!*

WE OFFER SUCCESS BUSINESS

DYULC is a universal logistics service provider committed to deliver the best universal logistics services to customers, including international logistics, unloading, warehousing, storing, special cargo shipping, etc. via logistics networks built at home and abroad. DYULC regards responsiveness, accuracy, and safety as the foremost service principles and commits itself to saving logistics costs, innovating processes, satisfying and impressing customers via continuous development of the most cost-effective and efficient logistics system, utilizing strong industry reputation and ample human resources to meet the goal of value creation for customers. With overflowing enthusiasm for the growth of national basic industries in the ever-intensifying global energy competition, we are supplying coal to leading business sites around the world. In addition, we challenge ourselves in improving national competitiveness and new quality management by ensuring stable supply of quality rare earth resources underpinning cutting-edge technologies around the world.
