

## Interactive Webinar

We are delighted to announce that we have arranged an exclusive Interactive Webinar for our Members with **Marco J. van Daal**, a Lecturer/Speaker who has over 20 years' experience extending to more than 55 countries on 5 continents.

Marco is Author of the book '**The Art of Heavy Transport**', and in addition to being a contributing member of the American Society of Mechanical Engineers (ASME) and the European Association of Abnormal Road Transport and Mobile Crane (ESTA). Marco also delivered the training for our eLearning Platform.

Fully funded by the Head Office, the **Interactive Webinar** is provided free for Members and will include an interesting case study of a power plant that planned an extension and went from 12x180 ton gensets to 6x300 ton. The intriguing case study shows how late changes in a project design can have a major influence on equipment selection and sourcing. Not to mention schedule overruns and all the associated cost. A perfect example that the heavy transport provider (or crane provider) should be involved from the early stages of the project.

The session will take place on **2 May 2022 at 12.00 London time** and will be recorded for those who are unable to participate due to varying time zones.
